

Cloud-Based Hybrid Biometric

TIMETEC TC20

Cloud-Based Time Attendance Terminal

TimeTec TC20 is a multi-biometric identification terminal featuring TimeTec's innovative advanced facial recognition technology.

With the latest algorithm and facial recognition related technologies, the device can perform recognition of a target in a distance from 0.3m to 2m and will function automatically when it detects a face in the detection distance so as to deliver better recognition quality in terms of speed and accuracy than the previous near-infrared facial recognition terminal.

With the applied Deep Learning algorithm, pose angle tolerance and anti-spoofing have been greatly enhanced against dynamic environment and various spoofing attacks. Apart from all these, together with the world's cutting-edge 3D Neuron Fingerprint Algorithm and comprehensive support in mainstream card modules, TimeTec TC20 must be a best fit in various working environments satisfying different customer's needs.
