D3180S

Metal Detectors with a Fever Detection

D3180S is a walk-through metal detector embedded with body temperature measurement. 18 detection zones and 256 sensitivity levels established the fastest and most efficient way for temperature measurement performances. Built-in with fever alarm with the tolerance of up to 37.3? - decrease detection error and avoid cross infection. This device replaces manual inspection methods with a systematic flow of accuracy detection. A dependable and flexible intelligence security solution. D3180S, a comprehensive security system to protect premise security.

Suitable to be used in exhibition centers, government offices, electronic factory, prison, bank & hotel.

Adjustable Sensitivity Levels
256 sensitivity levels measurement for each detection zone

***_

Password Protection
Heightened security under the operation of authorized personnel only

Harmless Screen Check
No potential danger to heart pacemaker wearers and pregnant women

Multi-location Detection
18 detection zones to accurately locate metal objects

Self-diagnosed Program
Automated Immediate health checker. Calibration- not-required

Anti-interference System
Strong shield of interference in environment to maintain performance analysis

YEAR 1
LIMITED WARRANTY
**12 Months for Resellers**

SPECIFICATIONS

MODEL	D3180S
Power Supply	AC100V~240V
Working Temperature	-20°C~50°C
Working Frequency	4kHz~8kHz
External Dimensions (H*W*D)	2220 x 835 x 578 (mm)
Internal Dimensions (H*W*D)	1990 x 700 x 578 (mm)
Package Dimensions (H*W*D)	2130 x 350 x 665 (mm)
Gross Weight	65kg
Temperature Sensor Type	IR temperature sensor
Temperature Measurement Time	≤1s
Temperature Measurement Point	Brow or wrist
Best Temperature Measurement Distance	150mm
Height of Temperature Sensor from the Ground	1500mm (customizable)
Temperature Measurement Deviation	±0.5°C
Temperature Range	30°C - 45°C
Interval Between Temperature Measurement	2s

Note: *Specifications are subject to change without prior notice.*
