COVID-19 Presents Businesses with Real Challenges

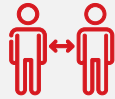

Current Challenges

Health Monitoring

- No ready health screening recording and monitoring system for staff and visitors
- Tedious manual system to take body temperature of staff and visitors
- No audit trail of changes made
- No system that can alert the PIC if staff or visitor has a fever.
- Process visitor registration

Social Distancing

- Common physical access control still has the risk of cross-contamination such as fingerprint machines.

Contact Traceability

- Difficulty to locate remote & mobile staff and who they meet
- No proper visitor records and staff that they meet in the office

Reduce Operating Costs

- Extra manpower for Covid-19 precautionary measures
- Manpower arrangement

TimeTec Back-to-Work Safely Product Line

Combat Covid-19

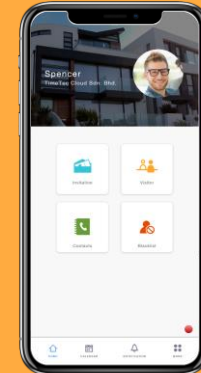

1. TimeTec Face Access (Hardware Series)

2. TimeTec TA (Time Attendance System)

3. TimeTec VMS (Visitor Management System)

1. TimeTec Face Access

Combat Covid-19

Social Distancing

Facial Recognition Technology

Contactless Devices for Staff Attendance Clocking & Access Control

Verify face with mask on

An option to block access if a staff doesn't put on a mask

Extra Protection

One by one verification to promote social distancing

Reduce Operating Costs

Save Resources

Replace obsolete system (e.g. logbook & punch card machine)

Embedded Body Temperature Sensor

Automated process, save manpower, accurate results

Time-saving & Labour-Saving

Systematic and automated

1. TimeTec Face Access

Combat Covid-19 Series

The following hardware products enhance access control automation and security with embedded **Body Temperature Detection, Face Recognition** Built-in with **Masked Face Recognition Option**

Smart AC-1/TD
Door Access for employees

ProFace X/TD (IP 68)
Door Access/Turnstile for employees
or outdoor environment

Body Temperature Detection IP camera
+ Black Body
Public scanning at immigration and
government offices

Metal Detector with Fever Detection
Public scanning at government office

1. Face Access (Basic Series*)

Go Contactless

BENEFITS OF FACIAL RECOGNITION

- Contactless
- Instant face detection
- Guaranteed identity verification
- Reduce risk of cross-contamination
- Improve traffic efficiency
- Labour cost savings
- Reduce data entry errors
- Centralized database
- Safe monitoring
- Integrable with **TimeTec TA & TimeTec VMS**

* Basic series: Recognizes face without mask, no embedded body temperature sensor

2. TimeTec TA Time Attendance System Combat Covid-19

Contact Traceability

Whereabouts of On-the-go staff

The system can trace the details

Health Monitoring

Audit Trail of Changes

To keep health record authentic

Body Temperature Record

Enable company to record staff temperature daily

Notification if Staff Fever

Alert PIC to take further action

Social Distancing

Mobile Clocking

Use of personal devices to complete attendance clocking

Face Verification

Integrable with Face Access hardware

Reduce Operating Costs

Less Manual Work

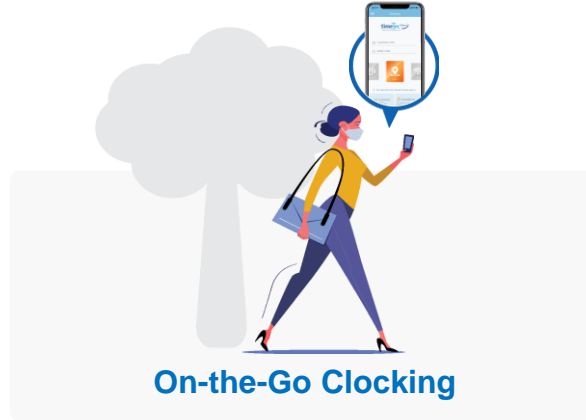

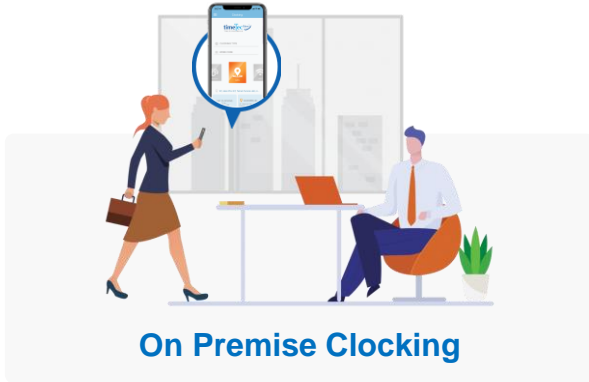

Saving time and manpower from redundant tasks

Less Material Required

Reports can be accessed and generated online

2. TimeTec TA Time Attendance System

Combat Covid-19 Features

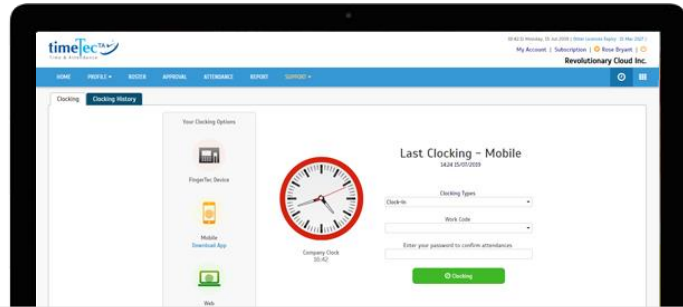

Monitoring: Record staff body temperature, comply with the Regulation 11 of the Prevention and Control of Infectious Diseases (No.3) Regulations 2020.

Traceability: Trace visits of sales & support staff for any contact of Covid-19 contraction: PUI, close contact & casual contact

Notification: Notify superior if staff is fever. Audit trail of changes on the temperature data.

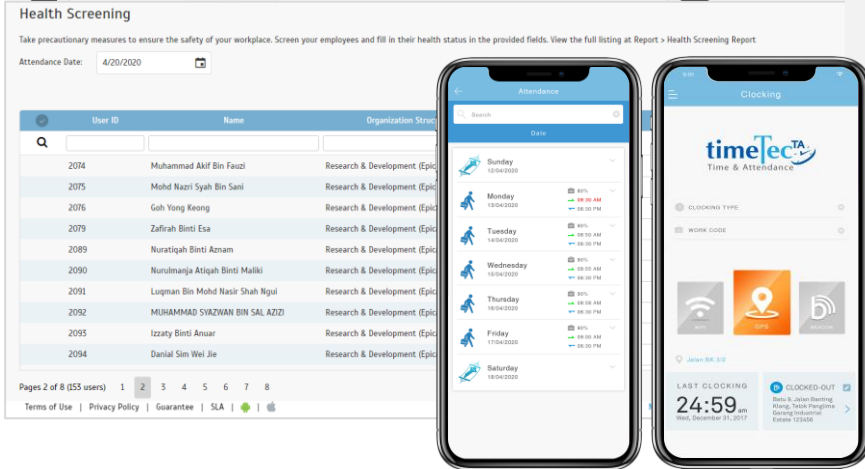

Contactless: Staff using their own smart phones to do attendance clocking.

2. TimeTec TA Time Attendance System

Other Features

- Save cost, BYOD concept
- Mobile clocking option: GPS, WiFi, NFC, QR code and Beacon
- Centralized data
- Real-time attendance monitoring
- Schedules, shifts and overtime made easy
- Linkable to various payrolls
- Memos & announcements
- Traceable mileage claim
- 35 reports
- Suitable for SME, MNC, government, school, hospital, etc

3. TimeTec VMS Visitor Management System Combat Covid-19

Contact Traceability

Traceable Visitation Record

Anybody who have direct contact with infected visitors can be retraced

Health Monitoring

Health Screening

Take records of visitors' health information (e.g. body temperature, travel history)

Receive Notification of Visitor with Fever

Alert PIC to take further action

Social Distancing

Visitor Pre-Registration

Register visitors online to reduce contact activities

QR Code Express Check-In

Avoid body contact with pre-registered access pass

Reduce Operating Costs

Unmanned Reception (i-Comm)

Eliminate the need for a receptionist

Easily Accessible Materials

All information is made readily available online

3. TimeTec VMS Visitor Management System

Combat Covid-19 Features

Lowering the risks of potential Covid-19 transmission among visitors

Preregistration from home

Health Screening

Traceable Contacts

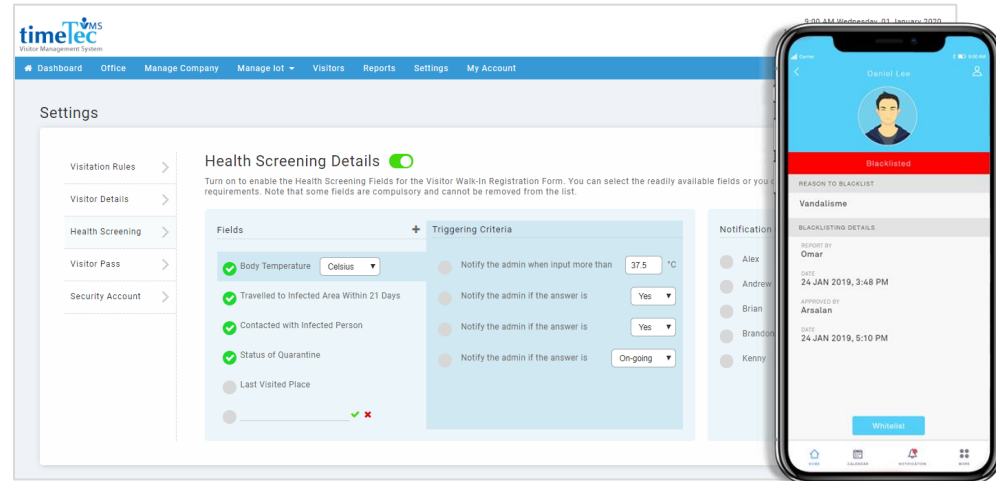

Contactless Access Control

Monitoring: Comply with the Regulation 11 of the Prevention and Control of Infectious Diseases (No.3) Regulations 2020 to record visitor body temperature.

Traceability: Trace visitor and staff if there is any contact with Covid-19 contraction for PUI, close contact & casual contact.

Notification: Access control with QR code or face verification.

Contactless: Alert PIC and disallows visit if visitor has a fever.

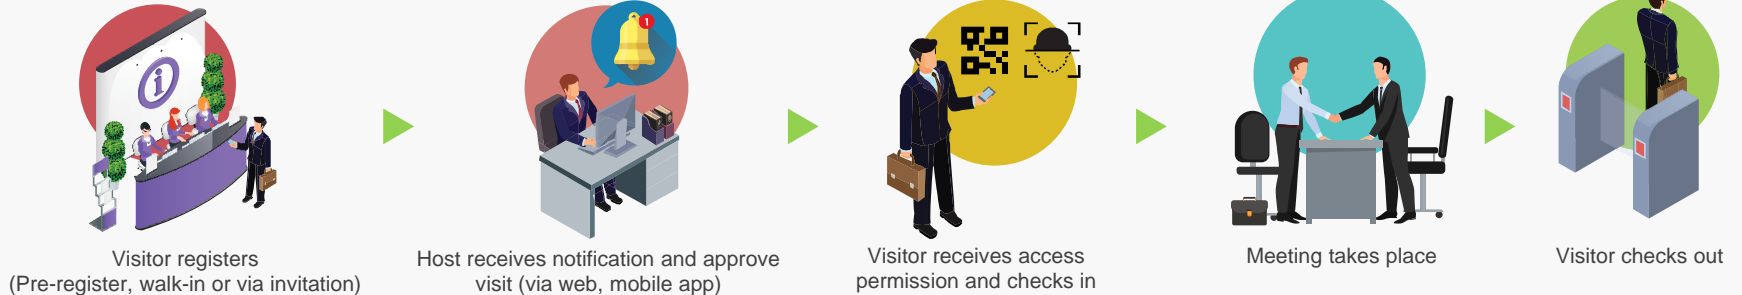

3. TimeTec VMS Visitor Management System

Other Features

- Blacklist menace
- Customizable e-form
- Calendar view
- OCR built-in, MyKad friendly
- Notification
- Integrable with TimeTec Parking & TimeTec Access
- Facility booking
- Suitable for SMEs to MNCs, office towers, schools, government offices, residential etc.

Process Flow of TimeTec VMS

Price Package

Solution	Model	Price Package
