Multiply Your Value with TA100C

Move to the modern era of time attendance with the TA100C biometric device. With a systematic method of data collection, all your staff will have to do is scan their fingerprint and presto! - your attendance record for the day has been taken care of. The eye-catching full colour TFT screen enhances the hi-tech look of the machine, and compliments the overall look of any office environment.

Eliminate Buddy Punching

The weakness with the clock-in card system is that 'buddy punching' can occur where one employee can clock in the time for another employee if any of them are late. Eliminate this occurrence by using the unique per-individual fingerprint as a clock-in card!

Workcodes

Let your staff experience more independence by reporting their whereabouts via our workcodes feature.

Easy Data Management

All you need is a USB flash disk to transfer transaction logs to your computer. It is that easy.

Short Message Display

Alert your staff by personalizing a short message to be displayed at the terminal when they verify.

Manage Attendance Data Online

TimeTec Cloud solution centralizes attendance data on a secured cloud server for easy management, monitoring and auditing. It is available online at a minimal subscription cost of USD2 per user monthly only.

User-Friendly Icons

Complete with configuration icons, the interface in TA100C couldn't be more user-friendly.

Full Colour Screen

This model comes with a full colour TFT screen. Display pictures corporate advertisements, screen savers and much more on the colour screen of the terminals.

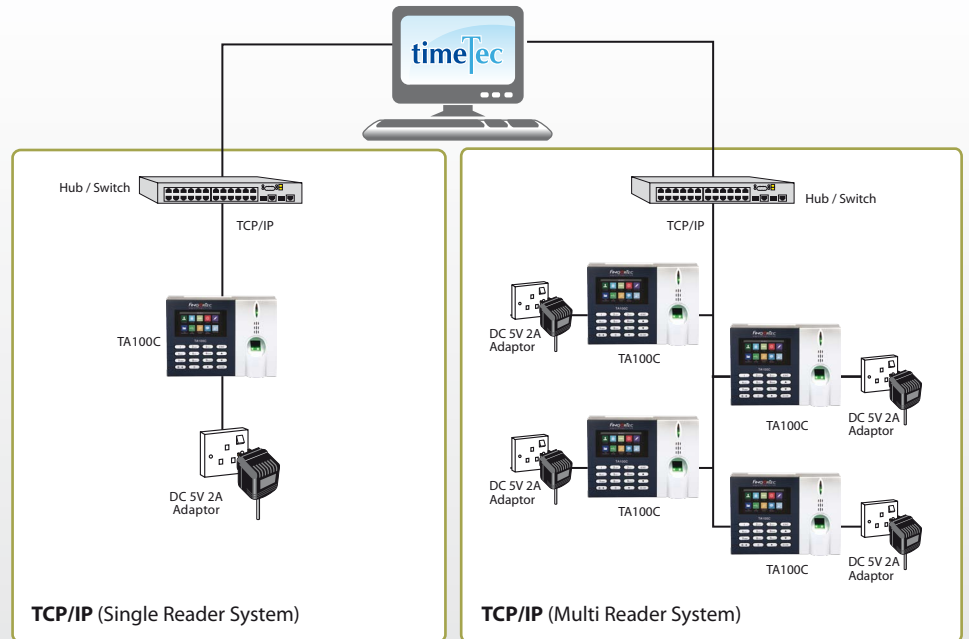

Value for Money

This model was designed to be economical so that you are able to implement FingerTec solutions at a lower cost. We believe that when it comes to security, there should be no compromise.
