WHAT IS **AWDMS?**

timeTec AWDMS

The TimeTec AWDMS is an online application that offers Application Programming Interface (API) for third-party application developers to integrate with TimeTec terminals; to retrieve user information, biometric data, transaction logs, and TimeTec devices information

EASY INTEGRATION

HUGE POTENTIAL CUSTOMERS

CONNECT WITH LATEST TECHNOLOGY

MADE FOR **DEVELOPERS & INTEGRATORS**

Real-Time Data Transferring
User info, transaction logs and terminal data transmission synchronized via an Internet connection (http protocol).

Data Centralization
Centralize multiple terminals to a single AWDMS database for easier data manipulation.

Easy Data Management
User information and logs can be uploaded and downloaded easily using TimeTec AWDMS.

COMPATIBLE **TERMINALS**

* Terminals sold separately

Smart AC1/TD
Entrance Access Control
Masked Face Recognition
• Fever Detection
• Face-with-mask verification
• Palm-Vein reading
