

Cloud-Based Hybrid Biometric

TIMETEC TC40

Cloud-Based Time Attendance Terminal

By harnessing advanced deep learning algorithms, the face recognition terminal stands out in swift and accurate verification, guaranteeing unmatched precision. This versatile system offers a spectrum of authentication options, spanning facial recognition and card-based methods. Its adaptability finds relevance across diverse scenarios, ranging from office and corporate settings to financial sectors and more, highlighting its broad applicability.

Proactive Facial Recognition

Advanced facial recognition technologies

New Height of Anti-Spoofing

Protect against print attack (laser, color and B/W photos), videos attack and 3D mask attack.

Speedy Recognition

Recognition happens in seconds

Further Authentication Distance

Impressive facial recognition distance spanning from 30cm to 150cm.

Touchless Recognition

Contactless for better hygiene

Various Clocking Methods

Face & Card

Instant Notification

Receive notification from tardiness and absenteeism (subject to subscription with TimeTec Attendance)

Stable Communication Method

Fast and stable connection for better performance

Linux-Based Hybrid Biometric

A highly reliable and secure operating system
