WebServiceLogin

- Description: Login to TimeTec web service
- Param: Username, Password
- Param Description:

Param	Description	Data Type	Size	Remark
Username	Value of Username is the username of TimeTec Cloud API login.	Varchar	50	Required
Password	Value of Password is the password of TimeTec Cloud API login.	Varchar	255	

- Return:

Type	Possible variable	Description	Data Type	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	Text	1. Username or password is not valid 2. Invalid parameter
Result	Status	Indicate whether or not the function is executed successfully		Success, Fail
	SecurityToken	Used for authentication for subsequent function. Need to put in SoapHeader when call subsequent function from web service. Eg (PHP). \$auth = array('SecurityToken'=>\$this->getSecurityToken()); \$header = new SoapHeader(\$this->namespace, 'WebServiceSoapHeader', \$auth, false);	Varchar (255)	CF4C25A5F6142BE2BDE0A5086B43825141C2AEA5

- Sample return message:
 - Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success",
    "SecurityToken": "CF4C25A5F6142BE2BDE0A5086B43825141C2AEA5"
  }
}
ii. Fail
{
  "ErrorMessage": "Username or password is not valid",
  "Result": {
    "Status": "Fail",
    "SecurityToken": ""
  }
}
```

GetCompanyID

- Description: To get Company ID
- Param: No parameter is required.
- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Security token is not valid 2. Invalid parameter
Result	Status		Success, Fail
	Company_ID	Company ID	387

- Sample return message:

```

i. Success
  {
    "ErrorMessage": "",
    "Result": {
      "Status": "Success",
      "CompanyID": "387"
    }
  }
ii. Fail

DateTo	Maximum 6 months period between DateFrom and DateTo			
LeaveType	Leave Type	Varchar	20	Optional
LeaveHour	Leave hours (HH format)	Decimal	7,3	Optional

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message

i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```

ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
```

```
"Status":"Fail"  
}  
}
```

SetUserLeave2

- Description: Add or update user leave
- Param: CompanyID, JSONUserLeave
- Param Description

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
JSONUserLeave	Input to be serialized into JSON. Sample: <pre>{ "UserID": "3001", "EmployeeID": "A117110", "DateFrom": "2019-12-30", "DateTo": "2019-12-31", "LeaveType": "Annual", "LeaveHour": "4.000", "UniqueID": "100001", "AMPM": "AM" }</pre>	Obj		

- JSONUserLeave:

Param	Description	Data Type	Size	Remark
UserID	User ID	Int	10	Either one of them is required. If both are provided, this function will use the user ID.
EmployeeID	Employee ID	Varchar	15	
DateFrom	DateFrom is the leave start date.	Date	yyyy-MM-dd	Required
DateTo	DateTo is the leave end date. Maximum 6 months period between DateFrom and DateTo	Date	yyyy-MM-dd	
LeaveType	Leave type	Varchar	200	
LeaveHour	Leave hour (HH format)	Decimal	7,3	Optional
UniqueID	Unique ID	Varchar	200	

AMP	AM/PM indicator	Enum	AM/PM	
-----	-----------------	------	-------	--

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

AddLeaveType

- Description: Add leave type
- Param: CompanyID, LeaveType
- Param Description:

Param	Description	Data Type	Size	Remark
Company ID	Company ID	Varchar	10	Required
Leave Type	Leave Type	Varchar	200	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateLeaveType

- Description: Update leave type
- Param: CompanyID, AutoNo, LeaveType
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Auto No.	Auto No	Int	10	
Leave Type	Leave Type	Varchar	200	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

AddUser

- Description: Add user
- Param: CompanyID, Name, Alias , Gender, DOB, Nationality, Race, NationalID, Religion, HomeAddress, MobileContact, Email, EmploymentID, Designation, SocialSecurityID, JoinedDate, Branch, Department, Section, GroupDutyRoster, RateHour, TimeZone, Remark, TimeTecUserID, TimeTecAccountIssuanceDate, AccExpiryDate, DivisionID
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Name	Name	Varchar	200	
Alias	Alias	Varchar	50	Optional
Gender	Gender	Enum	Female, Male	
DOB	Date of Birth	Date	yyyy-MM-dd	
Nationality	Nationality	Enum	https://www.fingertec.com/developerprogram/usermanual/Nationality.xlsx	
Race	Race	Varchar	50	
NationalID	National ID	Varchar	20	
Religion	Religion	Varchar	50	
HomeAddress	Home Address	Varchar	200	
MobileContact	Mobile Contact	Varchar	20	
Email	Personal Email	Varchar	100	
EmploymentID	Employment ID	Varchar	15	
Designation	Designation	Varchar	50	
SocialSecurityID	Social Security ID	Varchar	20	
JoinedDate	Joined Date	Date	yyyy-MM-dd	
Branch	Branch	Varchar	50	
Department	Department	Varchar	50	

Section	Section	Varchar	50	
GroupDutyRoster	Group Duty Roster	Smallint	3	
RateHour	Rate hour	Varchar	10	
TimeZone	Time Zone	Enum	https://www.fingertec.com/developerprogram/usermanual/Timezone.xlsx	
Remark	Remark	Varchar	100	
TimeTecUserID	TimeTec User ID	Int	10	Required
TimeTecAccountIssuanceDate	TimeTec Account Issuance Date	Date	yyyy-MM-dd	
AccExpiryDate	Account Expiry Date	Date	yyyy-MM-dd	Optional
DivisionID	Division ID	Bigint	20	Optional

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

AddUser2

- Description: Add user
- Param: CompanyID, JsonUserInfo
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
JsonUserInfo	Input to be serialized into JSON. Sample: <pre>{ "Name": "Tan Mei Cong", "TimeTecUserID": "1000018", "TimeTecAccountIssuanceDate": "2019-10-15", "AccExpiryDate": "2022-10-15", "Alias": "T.M.", "DOB": "1990-10-25", "Designation": "", "Email": "tmc@timeteccloud.com", "LoginEmail": "tanmeicong@gmail.com", "EmploymentID": "1000018", "Gender": "Female", "GroupDutyRoster": "", "HomeAddress": "18, Jalan Baru 2, Bukit Mertajam.", "JoinedDate": "2019-10-15", "MobileContact": "0188808080", "NationalID": "", "Nationality": "Malaysia", "Race": "Chinese", "RateHour": "", "Religion": "Christian", "Remark": "", "SocialSecurityID": "", "TimeZone": "UTC+08:00", "PositionLevel": "Fresh/Entry", "OrganizationStructure": ["OPERATIONS", "SUPPLY CHAIN", "PLANT OPERATIONS", "ENGINEERING", "ELECTRICAL - POWER PLANT"], "OrganizationStructureCode": ["1001", "1002", "1003", "1004", "1005"], "WebView": "1", "WebClocking": "1", "MobileView": "1",</pre>	Obj		

	<code>"MobileClocking": "1"</code> <code>}</code>			
--	--	--	--	--

- JsonUserInfo:

Param	Description	Data Type	Size	Remark
TimeTecUserID	TimeTec User ID	Int	10	Required
Name	Name	Varchar	200	
TimeTecAccountIssuanceDate	TimeTec Account Issuance Date	Date	yyyy-MM-dd	
Alias	Alias	Varchar	50	Optional
Gender	Gender	Enum	Female, Male	
DOB	Date of Birth	Date	yyyy-MM-dd	
Nationality	Nationality	Enum	https://www.finger Tec.com/developerprogram/usermanual/Nationality.xlsx	
Race	Race	Varchar	50	
NationalID	National ID	Varchar	20	
Religion	Religion	Varchar	50	
HomeAddress	Home Address	Varchar	200	
MobileContact	Mobile Contact	Varchar	20	
Email	Personal Email	Varchar	50	
LoginEmail	Login User Name (Email)	Varchar	100	
EmploymentID	Employment ID	Varchar	15	
Designation	Designation	Varchar	50	
SocialSecurityID	Social Security ID	Varchar	20	

JoinedDate	Joined Date	Date	yyyy-MM-dd	
GroupDutyRoster	Group Duty Roster	Smallint	3	
RateHour	Rate hour	Varchar	10	
TimeZone	Time Zone	Enum	https://www.fingertec.com/development/program/usermanual/Timezone.xlsx	
Remark	Remark	Varchar	100	
AccExpiryDate	Account Expiry Date	Date	yyyy-MM-dd	
DivisionID	Division ID	Bigint	20	
PositionLevel	Position Level	Varchar	200	
OrganizationStructure	Organization Structure	Array of Varchar	Ex. ["OPERATIONS", "SUPPLY CHAIN", "PLANT OPERATIONS", "ENGINEERING", "ELECTRICAL - POWER PLANT"]	At least one of the parameters is required if you want to add/update the user to an Organization Structure. If both parameters are provided, this function will add/update the user to OrganizationStructure and ignore OrganizationStructureCode. The values for OrganizationStructure and OrganizationStructureCode must be arranged in a predefined sequence starting with the sub-level of the company name.
OrganizationStructureCode	Organization Structure Code (Company Registration No.)	Array of Varchar	Ex. ["1001", "1002", "1003", "1004", "1005"]	
WebView	Enable or disable web access view	Tinyint	1	Optional Required value if include parameters
WebClocking	Enable or disable web access clock in	Tinyint	1	Value:

MobileView	Enable or disable mobile access view	Tinyint	1	0: Disable 1: Enable
MobileClocking	Enable or disable mobile access clocking	Tinyint	1	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateUser

- Description: Update user records
- Parameters: CompanyID, TimeTecUserID, Name, Alias , Gender, DOB, Nationality, Race, NationalID, Religion, HomeAddress, MobileContact, Email, EmploymentID, Designation, SocialSecurityID, JoinedDate, Branch, Department, Section, GroupDutyRoster, RateHour, TimeZone, Remark, TimeTecAccountIssuanceDate, AccExpiryDate
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
TimeTecUserID	TimeTec User ID	Int	10	
Name	Name	Varchar	200	
Alias	Alias	Varchar	50	Optional
Gender	Gender	Enum	Female, Male	
DOB	Date of Birth	Date	yyyy-MM-dd	
Nationality	Nationality	Enum	https://www.fingertec.com/developerprogram/usermanual/Nationality.xlsx	
Race	Race	Varchar	50	
NationalID	National ID	Varchar	20	
Religion	Religion	Varchar	50	
HomeAddress	Home Address	Varchar	200	
MobileContact	Mobile Contact	Varchar	20	
Email	Personal Email	Varchar	100	
EmploymentID	Employment ID	Varchar	15	
Designation	Designation	Varchar	50	
SocialSecurityID	Social Security ID	Varchar	20	

JoinedDate	Joined Date	Date	yyyy-MM-dd	
Branch	Branch	Varchar	50	
Department	Department	Varchar	50	
Section	Section	Varchar	50

RateHour	Rate hour	Varchar	10	
TimeZone	Time Zone	Enum	https://www.fingertec.com/developerprogram/usermanual/Timezone.xlsx	
Remark	Remark	Varchar	100	
TimeTecAccountIssuanceDate	TimeTec Account Issuance Date	Date	yyyy-MM-dd	Required
AccExpiryDate	Account Expiry Date	Date	yyyy-MM-dd	Optional
DivisionID	Division ID	Bigint	20	Optional

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```

```
    }  
ii. Fail  
    {  
      "ErrorMessage": "Invalid parameter",  
      "Result": {  
        "Status": "Fail"  
      }  
    }  
  }
```

UpdateUser2

- Description: Update user records
- Parameters: CompanyID, JsonUserInfo
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
JsonUserInfo	Input to be serialized into JSON. Sample: <pre>{ "Name": "Tan Mei Cong", "TimeTecUserID": "1000018", "EmployeeID": "A117110", "TimeTecAccountIssuanceDate": "2019-10-15", "AccExpiryDate": "2022-10-15", "Alias": "T.M.", "DOB": "1990-10-25", "Designation": "", "Email": "tmc@timetecloud.com", "LoginEmail": "tanmeicong@gmail.com", "EmploymentID": "1000018", "Gender": "Female", "GroupDutyRoster": "", "HomeAddress": "18, Jalan Baru 2, Bukit Mertajam.", "JoinedDate": "2019-10-15", "MobileContact": "0188808080", "NationalID": "", "Nationality": "Malaysia", "Race": "Chinese", "RateHour": "", "Religion": "Christian", "Remark": "User resigned.", "SocialSecurityID": "", "TimeZone": "UTC+08:00", "PositionLevel": "Fresh/Entry", "OrganizationStructure": ["OPERATIONS", "SUPPLY CHAIN", "PLANT OPERATIONS", "ENGINEERING", "ELECTRICAL - POWER PLANT"], "OrganizationStructureCode ": ["1001", "1002", "1003", "1004", "1005"], "Status": "Suspended", "EffectiveDate": "2019-11-22", "WebView": "1", "WebClocking": "1", "MobileView": "1", "MobileClocking": "1" }</pre>	Obj		

- JsonUserInfo:

Param	Description	Data Type	Size	Remark
TimeTecUserID	TimeTec User ID (Can accept both parameter name as TimeTecUserID or UserID)	Int	10	At least one of them is require. If both are given, the function will use TimeTecUserID
EmployeeID	Employee ID	Varchar	15	
Name	Name	Varchar	200	Required
TimeTecAccountIssuanceDate	TimeTec Account Issuance Date	Date	yyyy-MM-dd	Optional
Alias	Alias	Varchar	50	
Gender	Gender	Enum	Female, Male	
DOB	Date of Birth	Date	yyyy-MM-dd	
Nationality	Nationality	Enum	https://www.fingertec.com/developerprogram/usermanual/Nationality.xlsx	
Race	Race	Varchar	50	
NationalID	National ID	Varchar	20	
Religion	Religion	Varchar	50	
HomeAddress	Home Address	Varchar	200	
MobileContact	Mobile Contact	Varchar	20	
Email	Personal Email	Varchar	50	
LoginEmail	Login User Name (Email)	Varchar	100	
EmploymentID	Employment ID	Varchar	15	
Designation	Designation	Varchar	50	

SocialSecurityID	Social Security ID	Varchar	20	
JoinedDate	Joined Date	Date	yyyy-MM-dd	
GroupDutyRoster	Group Duty Roster	Smallint	3	
RateHour	Rate hour	Varchar	10	
TimeZone	Time Zone	Enum	https://www.fingertec.com/developerprogram/usermanual/Timezone.xlsx	
Remark	Remark	Varchar	100	
AccExpiryDate	Account Expiry Date	Date	yyyy-MM-dd	
DivisionID	Division ID	Bigint	20	
PositionLevel	Position Level	Varchar	200	
OrganizationStructure	Organization Structure	Array of Varchar		At least one of the parameters is required if you want to add/update the user to an Organization Structure.
OrganizationStructureCode	Organization Structure Code (Company Registration No.)	Array of Varchar	Ex. ["1001", "1002", "1003", "1004", "1005"]	If both parameters are provided, this function will add/update the user to OrganizationStructure and ignore OrganizationStructureCode. The values for OrganizationStructure and OrganizationStructureCode must be

				arranged in a predefined sequence starting with the sub-level of the company name.
Status	Employment status (ex. "Active", "Terminated", "Suspended", "Resigned")	Varchar	150	Optional
EffectiveDate	Effective date (maximum date is today's date)	Date	yyyy-MM-dd	
WebView	Enable or disable web access view	Tinyint	1	Optional Required value if include parameters Value: 0: Disable 1: Enable
WebClocking	Enable or disable web access clock in	Tinyint	1	
MobileView	Enable or disable mobile access view	Tinyint	1	
MobileClocking	Enable or disable mobile access clocking	Tinyint	1	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

```

i. Success
    {
      "ErrorMessage": "",
      "Result": {
        "Status": "Success"
      }
    }
  
```

```
ii. Fail
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateUserStatus

- Description: Update user's employment status.
- Param: CompanyID, Status, UserList (UserID, EffectiveDate, Remark)
- Param description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Status	Employment status (ex. "Active", "Terminated", "Suspended", "Resigned")	Varchar	150	Required
UserList	Input to be serialized into JSON. Sample: [{ "UserID":"123", "EffectiveDate":"2019-10-30", "Remark":"User resigned." }, { "UserID":"456", "EffectiveDate":"2019-10-29", "Remark":"" }]	Obj	50	Required

- UserList parameters:

Param	Description	Data Type	Size	Remark
UserID	User ID	Varchar	10	Required
EffectiveDate	Effective date (maximum date is today's date)	Date	yyyy-MM-dd	Optional
Remark	Remark	Varchar	100	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if	1. Invalid parameter

		there is an error while executing this function	
Result	Status		Success/Fail

- Sample return message:

```
i. Success
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}

ii. Fail
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

GetSchedule

- Description: Get schedule data by schedule ID
- Param: CompanyID, ScheNo
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Unique ID assigned to company	Varchar	10	Required
ScheNo	Schedule Number	Smallint	3	Required

- Return

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter 2. Security token is not valid
Result	Status		Success, Fail
	Auto_No	Schedule Unique ID	34427
	Weekday		Wednesday
	Company_ID		351
	ScheNo		1
	ScheDesc		Shift 1
	ScheType		1
	Dayofweek		0
	DayType		Workday, Restday
	In	In clocking time (12, 24 format)	09:00 AM, 14:00

UpdateCompanySetting

- Description: Update company setting
- Param: CompanyID, CompanyName, Phone, Fax, CompanyEmail, Address, Country, ContactPerson, DateFormat, TimeFormat, HourFormat, TimeZone, PayrollCycle, PreferredLanguage, AllowSupportLogin, Calendar, FirstDayOfWeek, CurrencySymbol, GridSize, Timeout, PayrollCycleStartDate
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
CompanyName	Company Name	Varchar	60	
Phone	Phone	Varchar	40	
Fax	Fax			
CompanyEmail	Company email	Varchar	60	
Address	Company address	Varchar	500	
Country	Country	Varchar	2	
ContactPerson	Contact person	Varchar	60	Optional
DateFormat	Date format	Varchar	3	Required
TimeFormat	Time format			
HourFormat	Hour format			
TimeZone	Time zone			
PayrollCycle	Payroll cycle	Tinyint	1	
PreferredLanguage	Preferred language	Varchar	255	Optional
AllowSupportLogin	Allow support login	Tinyint	1	
Calendar	Calendar	Varchar	50	

FirstDayOfWeek	First day of week	Tinyint	1	Required
CurrencySymbol	Currency symbol	Varchar	3	Optional
GridSize	Grid size	Smallint	3	Required
Timeout	Timeout	Tinyint	3	
PayrollCycleStartDate	Payroll cycle start date	Date	yyyy-MM-dd	Optional

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

AddBranch

- Description: Add branch
- Param: CompanyID, Branch
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Branch	Branch	Varchar	50	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateBranch

- Description: Update branch
- Param: CompanyID, AutoNo, Branch
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Auto No.	Auto No	Int	10	
Branch	Branch	Varchar	50	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

AddDepartment

- Description: Add department
- Param: CompanyID, Department
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Department	Department	Varchar	50	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateDepartment

- Description: Update department
- Param: CompanyID, AutoNo, Department
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Auto No.	Auto No	Int	10	
Department	Department	Varchar	50	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

AddSection

- Description: Add section
- Param: CompanyID, Section
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Section	Section	Varchar	50	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateSection

- Description: Update section
- Param: CompanyID, AutoNo, Section
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Auto No.	Auto No	Int	10	
Section	Section	Varchar	50	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

AddRemark

- Description: Add remark
- Param: CompanyID, Remark,WorkCode
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Remark	Remark	Varchar	50	
WorkCode	Work Code	Int	10	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateRemark

- Description: Update remark
- Param: CompanyID, AutoNo, Remark, WorkCode
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Auto No.	Auto No	Int	10	
Remark	Remark	Varchar	50	
WorkCode	Work Code	Int	10	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateDayType

- Description: Update day type
- Param: CompanyID, AutoNo, DayType, PeriodicTotal, WorkRate, OTRate, DiffOTRate
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
Auto No.	Auto No	Int	10	
DayType	Remark	Varchar	20	
PeriodicTotal	Sum periodic flag (0, 1)	Tinyint	1	Optional
WorkRate	Normal work rate %	Smallint	3	
OTRate	Overtime rate %			
DiffOTRate	Differential overtime rate %			

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

```
}
}
```

GetOrgStructure

- Description: Get Organization Structure
- Param: CompanyID
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail
	ID	Division ID	322
	ParentID	Division Parent ID	0
	Division	Division name	Board of Director
	DivisionType	Division Type	1: Division 2: Patrol Location
	CompanyRegistrationID	Company Registration ID	
	Email	Email Address	bom@gmail.com
	PhoneNo	Telephone No	
	FaxNo	Telephone Fax No	
	Address	Billing Address	

	CountryCode	Country Code	MY
	CurrencySymbol	Currency Symbol	RM
	CreateDate		2016-02-23 10:44:58
	LastUpdate		2016-02-23 10:44:58

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success",
    "OrgStructureObj": [
      {

    "OrgStructureObj": ""
  }
}
```

GetOrgStructureHoliday

- Description: Get Organization Structure Holiday
- Param: CompanyID, DivisionID, CheckTimeFrom, CheckTimeTo, RecordStartFrom, LimitRecordShow
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
DivisionID	Division ID	Bigint	20	
CheckTimeFrom	CheckTimeFrom is the start clocking date CheckTimeTo is the end of clocking date Maximum 1 year period between CheckTimeFrom and CheckTimeTo	Date	yyyy-MM-dd	Required
CheckTimeTo				
RecordStartFrom	RecordStartFrom is to show record start from the input number Default value is 0.	Int	11	Optional
LimitRecordShow	LimitRecordShow Is the total number of record to show. Maximum number of records show is 1000. Default value is 1000.			

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail
	Date	Holiday date	2016-02-08
	Holiday	Holiday	Chinese Lunar New Year's Day

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success",

GetApprovedSumWorkingHour

- Description: Get the total of work and OT hours for respective daytypes.
- Param: CompanyID, UserID/EmployeeID, CheckTimeFrom, CheckTimeTo, RecordStartFrom, LimitRecordShow
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Unique ID assigned to company	Varchar	10	Required
UserID	Unique ID assigned to company user	Int	10	At least one of the parameters is required if you want to get a specific user's attendance detail. If both parameters are provided, this function will return users' attendance detail based on the user ID. If none of the parameters is provided, this function will return all users' attendance detail.
EmployeeID	A Unique ID assigned to company user	Varchar	15	
CheckTimeFrom	CheckTimeFrom is the start of the clocking date. CheckTimeTo is the end of the clocking date. Maximum 1 month period (31days) between CheckTimeFrom and CheckTimeTo	Date	yyyy-MM-dd	Required
CheckTimeTo				
RecordStartFrom	RecordStartFrom is to show record start from the input number Default value is 0.	Int	11	Optional
LimitRecordShow	LimitRecordShow Is the total number of record to show. Maximum			

	number of records show is 1000. Default value is 1000.			
--	--	--	--	--

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter 2. Security token is not valid
Result	Status		Success, Fail
	User_ID	User ID	
	Employee_ID	Employee ID	
	Name	Name	
	DateFrom	Start Date (DMY, MDY, YMD format)	26/02/2020 02/26/2020 2020/02/26
	DateTo	End Date (DMY, MDY, YMD format)	26/02/2015 02/26/2015 2015/02/26
	WorkDayWorkHour	Sum of approved WorkDay Work hour (HM, HH format) for the selected date range	250.32
	WorkDayOverTime	Sum of WorkDay OverTime hour (HM, HH format) for the selected date range	17.11
	WorkDayDiffOT	Sum of WorkDay Differential OT hour (HM, HH format) for the selected date range	5.11
	HolidayWorkHour	Sum of approved Holiday Work hour (HM, HH format) for the selected date range	250.32
	HolidayOverTime	Sum of Holiday OverTime hour (HM, HH format) for the selected date range	17.11

	HolidayDiffOT	Sum of Holiday Differential OT hour (HM, HH format) for the selected date range	5.11
	RestdayWorkHour	Sum of approved Restday Work hour (HM, HH format) for the selected date range	250.32
	RestdayOverTime	Sum of Restday OverTime hour (HM, HH format) for the selected date range	17.11
	RestdayDiffOT	Sum of Restday Differential OT hour (HM, HH format) for the selected date range	5.11
	OffdayWorkHour	Sum of approved Offday Work hour (HM, HH format) for the selected date range	250.32
	OffdayOverTime	Sum of Offday OverTime hour (HM, HH format) for the selected date range	17.11
	OffdayDiffOT	Sum of Offday Differential OT hour (HM, HH format) for the selected date range	5.11

}
```

GetAuditDataByClockingMethod

- Description: Get audit data by clocking method
- Param: CompanyID, CheckTimeDate , RecordStartFrom, LimitRecordShow
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Unique ID assigned to company	Varchar	10	Required
UserID	The unique ID assigned to company user	Int	10	Optional
CheckTimeFrom	CheckTimeFrom is the start clocking date and created date	Date	yyyy-MM-dd	Required. Maximum 1 month period between CheckTimeFrom and CheckTimeTo
CheckTimeTo	CheckTimeTo is the end of clocking date and created date			
ClockingMethod	User clocking method	Enum	device, mobile, web	Required
RecordStartFrom	RecordStartFrom is to show record start from the input number Default value is 0.	Int	11	Optional
LimitRecordShow	LimitRecordShow Is the total number of record to show. Maximum number of records show is 1000. Default value is 1000.			

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter 2. Security token is not valid
Result	Status		Success, Fail
	Terminal_ID	Terminal ID	1
	Email		

	User_ID	User ID	92
	CheckTime	Clocking time	31/10/2013 12:00:02
	CheckType	Clocking Type 0 : Check-In 1 : Check Out 2 : Break Out 3 : Resume In 4 : OT-In 5 : OT-Out	0, 1, 2, 3, 4, 5
	DeviceID	FingerTec Device Serial No / Mobile ID	
	Location	GPS location	
	Coordinate	GPS coordinates (latitude, longitude)	3.1871767,101.6775462

- Sample return message

- iii. Success

```
{
  "ErrorMessage": "",

GetAuditDataByDate

- Description: Get 1 day audit data
- Param: CompanyID, CheckTimeDate , RecordStartFrom, LimitRecordShow
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Unique ID assigned to company	Varchar	10	Required
CheckTimeDate	Clocking date	Date	yyyy-MM-dd	Required
RecordStartFrom	RecordStartFrom is to show record start from the input number Default value is 0.	Int	11	Optional
LimitRecordShow	LimitRecordShow Is the total number of record to show. Maximum number of records show is 1000. Default value is 1000.			

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter 2. Security token is not valid
Result	Status		Success, Fail
	User_ID	User ID	92
	Terminal_ID	Terminal ID	1
	Terminal_SN	Serial No.	7307734
	Email		
	CheckTime	Clocking time	31/10/2013 12:00:02
	CheckType	Clocking Type 0 : Check-In	0, 1, 2, 3, 4, 5

		1 : Check Out 2 : Break Out 3 : Resume In 4 : OT-In 5 : OT-Out	
--	--	--	--

- Sample return message

- v. Success

```

{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success",
    "AuditDataObj": [
      {
        "User_ID": "92",
        "Terminal_ID": "15",

        "Email": "",
        "CheckTime": "31/10/2013 12:00:02",
        "CheckType": "0"
      }
    ]
  }
}

```

- vi. Fail

```

{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail",
    "AuditDataObj": ""
  }
}

```

GetAuditDataCount

- Description: Get 1 day audit data total count
- Param: CompanyID, CheckTimeDate
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Unique ID assigned to company	Varchar	10	Required
CheckTimeDate	Clocking date	Date	yyyy-MM-dd	Required

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter 2. Security token is not valid
Result	Status		Success, Fail
	AuditDataCount	Total audit data count	1

- Sample return message

i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success",
    "AuditDataCount": "1"
  }
}
```

ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail",
    "AuditDataCount": ""
  }
}
```

AddOrgStructure

- Description: Add organization structure
- Param: CompanyID, ParentID, Division, DivisionType, CompanyRegistrationID, Email, PhoneNo, FaxNo, Address, CountryCode, CurrencySymbol
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
ParentID	Parent ID	Bigint	20	
Division	Division name	Varchar	250	
DivisionType	Division Type Default value is Division.	Enum	Division, Patrol Location	
CompanyRegistrationID	Company Registration ID	Varchar	50	Optional
Email	Division Email	Varchar	60	
PhoneNo	Division Phone No	Varchar	40	
FaxNo	Division Fax No	Varchar	50	
CountryCode	Division Country Code	Varchar	2	
CurrencySymbol	Division Currency Symbol	Enum	https://www.fingertec.com/developerprogram/usermanual/CurrencySymbol.xlsx	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

	ID	New Division ID	451
--	----	-----------------	-----

- Sample return message:

- i. Success

```
{  
  "ErrorMessage": "",  
  "Result": {  
    "Status": "Success",  
    "ID": "451"  
  }  
}
```

- ii. Fail

```
{  
  "ErrorMessage": "Invalid parameter",  
  "Result": {  
    "Status": "Fail"  
  }  
}
```

AddOrgStructure2

- Description: Add organization structure
- Param: CompanyID, JSONOrgStructureInfo
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
JSONOrgStructureInfo	Input to be serialized into JSON. Sample: <pre>{ "ParentID": "2002", "Division": "Management", "DivisionType": "division", "ParentCode": "XF-15431", "ParentCodeArray": ["XF-15431", "XF-15432"], "Code": "XF-15432", "Email": "testing@email.com", "PhoneNo": "031236124", "FaxNo": "031236121", "Address": "iTech 02-08, Cyberjaya", "CountryCode": "MY", "CurrencySymbol": "RM", "AllowDuplicate": "yes" }</pre>	Obj		

- JSONOrgStructureInfo:

Param	Description	Data Type	Size	Remark
ParentID	Parent ID	Bigint	20	At least one of the parameters is required if you want to add/update the Organization Structure.
ParentCode	Parent Code (Parent Company Registration No.)	Varchar	50	
ParentCodeArray	Parent Code (Parent Company Registration No.)	Array of Varchar	Ex. ["1001", "1002", "1003", "1004", "1005"]	If three of the parameters are provided, this function will assign Organization

				<p>Structure under ParentID and ignore ParentCode and ParentCodeArray.</p> <p>The values for ParentCodeArray must be arranged in a predefined sequence starting with the first level of Organization Structure. E.g. ["0", "1001", "1002", "1003", "1004", "1005"]</p>
Division	Division name	Varchar	250	Required
DivisionType	Division Type Default value is Division.	Enum	Division, Patrol Location	Optional
Code	Code (Company Registration No.)	Varchar	50	
Email	Division Email	Varchar	60	
PhoneNo	Division Phone No	Varchar	40	
FaxNo	Division Fax No	Varchar	50	
CountryCode	Division Country Code	Varchar	2	
CurrencySymbol	Division Currency Symbol	Enum	https://www.fingertec.com/developerprogram/userm	

			<i>anual/CurrencySymbol.xlsx</i>	
AllowDuplicate	Allow same code for different division Default value is No.	Enum	Yes,No	Optional

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail
	ID	New Division ID	451

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success",
    "ID": "451"
  }
}
```

- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

UpdateOrgStructure

- Description: Update organization structure records
- Param: CompanyID, ParentID, ID, Division, DivisionType, CompanyRegistrationID, Email, PhoneNo, FaxNo, Address, CountryCode, CurrencySymbol
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
ParentID	Parent ID	Bigint	20	
ID	Division ID	Bigint	20	
Division	Division name	Varchar	250	
CompanyRegistrationID	Company Registration ID	Varchar	50	Optional
Email	Division Email	Varchar	60	
PhoneNo	Division Phone No	Varchar	40	
FaxNo	Division Fax No	Varchar	50	
CountryCode	Division Country Code	Varchar	2	
CurrencySymbol	Division Currency Symbol	Enum	https://www.fingertec.com/developerprogram/usermanual/CurrencySymbol.xlsx	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter

Result	Status		Success, Fail
--------	--------	--	---------------

- Sample return message:

- i. Success

```
{  
  "ErrorMessage": "",  
  "Result": {  
    "Status": "Success"  
  }  
}
```

- ii. Fail

```
{  
  "ErrorMessage": "Invalid parameter",  
  "Result": {  
    "Status": "Fail"  
  }  
}
```

UpdateOrgStructure2

- Description: Update organization structure records
- Param: CompanyID, JSONOrgStructureInfo
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
JSONOrgStructureInfo	Input to be serialized into JSON. Sample: <pre>{ "ParentID": "2002", "Division": "Management", "ParentCodeArray": ["XF-15431", "XF-15432"], "ID": "2002", "Code": "XF-15432", "Email": "testing@email.com", "PhoneNo": "031236124", "FaxNo": "031236121", "Address": "iTech 02-08, Cyberjaya", "CountryCode": "MY", "CurrencySymbol": "RM" }</pre>	Obj		

- JSONOrgStructureInfo:

Param	Description	Data Type	Size	Remark
ParentID	Parent ID	Bigint	20	At least one of the parameters is required if you want to add/update the Organization Structure. If two of the parameters are provided, this function will assign Organization Structure under ParentID and
ParentCodeArray	Parent Code (Parent Company Registration No.)	Array of Varchar	Ex. ["1001", "1002", "1003", "1004", "1005"]	

				<p>ignore ParentCode and ParentCodeArray.</p> <p>The values for ParentCodeArray must be arranged in a predefined sequence starting with the first level of Organization Structure. E.g. ["0", "1001", "1002", "1003", "1004", "1005"]</p>
ID	ID	Bigint	20	At least one of the parameters is required
Code	Code (Company Registration No.)	Varchar	50	
Division	Division name	Varchar	250	Optional
Email	Division Email	Varchar	60	
PhoneNo	Division Phone No	Varchar	40	
FaxNo	Division Fax No	Varchar	50	
CountryCode	Division Country Code	Varchar	2	
CurrencySymbol	Division Currency Symbol	Enum	https://www.fingertec.com/development/program/usermanual/CurrencySymbol.xlsx	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

i. Success

```
{  
  "ErrorMessage": "",  
  "Result": {  
    "Status": "Success"  
  }  
}
```

ii. Fail

```
{  
  "ErrorMessage": "Invalid parameter",  
  "Result": {  
    "Status": "Fail"  
  }  
}
```

DeleteOrgStructure

- Description: Delete organization structure records
- Param: CompanyID, ID
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
ID	Division ID	Bigint	20	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```
- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

DeleteOrgStructure2

- Description: Delete organization structure records
- Param: CompanyID, JSONOrgStructureInfo
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
JSONOrgStructureInfo	Input to be serialized into JSON. Sample: <pre>{ "ID": "2002", "Code": "XF-15432" }</pre>	Obj		

- JSONOrgStructureInfo:

Param	Description	Data Type	Size	Remark
ID	ID	Bigint	20	At least one of the parameters is required
Code	Code (Company Registration No.)	Varchar	50	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success

```
{  
  "ErrorMessage": "",  
  "Result": {  
    "Status": "Success"  
  }  
}
```

- ii. Fail

```
{  
  "ErrorMessage": "Invalid parameter",  
  "Result": {  
    "Status": "Fail"  
  }  
}
```

AssignOrgStructure

- Description: Reallocate organization structure
- Param: CompanyID, JSONOrgStructureInfo
- Param Description:

Param	Description	Data Type	Size	Remark
CompanyID	Company ID	Varchar	10	Required
JSONOrgStructureInfo	Input to be serialized into JSON. Sample: <pre> Sample: { "ParentID":"2002", "ID": "22", "ParentCode":"XF-15431", "OriginalParentCodeArray": ["XF-15434", "XF-15433"], "ParentCodeArray": ["XF-15431", "XF-15433"], "Code":"XF-15432" } </pre>	Obj		

- JSONOrgStructureInfo:

Param	Description	Data Type	Size	Remark
ParentID	Parent ID	Bigint	20	At least one of the parameters is required if you want to add/update the Organization Structure.
ParentCode	Parent Code (Parent Company Registration No.)	Varchar	50	
ParentCodeArray	Destinated Parent Code Array (Parent Company Registration No.)	Array of Varchar	Ex. ["1001", "1002", "1003", "1004", "1005"]	

				ParentCode and ParentCodeArray. The values for ParentCodeArray must be arranged in a predefined sequence starting with the first level of Organization Structure. E.g. ["0", "1001", "1002", "1003", "1004", "1005"]
ID	ID	Bigint	20	At least one of the parameters is required
Code	Code (Company required Registration No.)	Varchar	50	
OriginalParentCodeArray	Original Parent Code Array (Parent Company Registration No.)	Varchar	"Ex. ["1001", "1002", "1003", "1004", "1005"]"	

- Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	1. Invalid parameter
Result	Status		Success, Fail

- Sample return message:

- i. Success
 - {
 - "ErrorMessage": "",
 - "Result": {
 - "Status": "Success"
 - }
 - }
- ii. Fail
 - {
 - "ErrorMessage": "Invalid parameter",
 - "Result": {
 - "Status": "Fail"
 - }
 - }

WebServiceLogout

- i. Description: Logout from the session
- ii. Parameters:

Param	Description	Data Type	Size	Remark
ST	Token returned from WebServiceLogin function	String	Varchar (20)	Required

- iii. Return:

Type	Possible variable	Description	Possible value
Error Message	ErrorMessage	Return error message if there's error while execute this function	
Result	Status		Success, Fail

- iv. Sample return message

- i. Success

```
{
  "ErrorMessage": "",
  "Result": {
    "Status": "Success"
  }
}
```

- ii. Fail

```
{
  "ErrorMessage": "Invalid parameter",
  "Result": {
    "Status": "Fail"
  }
}
```

The image features a white background with decorative blue geometric shapes at the top and bottom. These shapes consist of overlapping triangles and polygons in various shades of blue, creating a modern, abstract design. A thin, light gray line runs diagonally across the page, intersecting the blue shapes.
